

## **MAC 140**

### **Aluminium or PVC Machining Centre**

- Advanced industrial CNC 3-axis profile machining system
- Completes milling and drilling process on Aluminium, PVC and steel (up to 2mm)
- Adopts imported high precision linear bearings system, ball screws, gear racks and servo motor to ensure smooth motion, positioning and processing in high precision
- Central lubrication system eases the machine maintenance
- Data transfer is available via network connection or USB interface to import CAD file or etc

### **Technical Features**

- Power supply: 415V, 3ph, 50-60Hz
- Power output: 8kW, 32A
- Air consumption 80L/min
- Minimum profile height 30mm
- Maximum profile height 140mm
- Maximum profile width 150mm
- Machine height 1950mm
- Machine length 1210mm
- Conveyor length 2910mm
- Machine width 1550mm
- Machine weight 650kg
